This action is responsive to the communication filed February 9, 2006.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 and 10-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Taylor et al.

Davis shows an absorption refrigeration system where the heat supply is regulated by interconnected valves 30, 31, but they are in a Y housing. Taylor et al show a three way valve which can be in a T or a Y housing. It would have been obvious at the time the invention was made for one of ordinary skill in the art to have used such a T housing as taught by Taylor et al in place of the Y housing of Davis in view of the equivalence taught by Taylor et al. The use of a computer to control the system is seen to be an obvious expedient in view of the state of the control systems art, and the use of a sink such as to recover heat from the system is considered to be an obvious step in view of the recognized desirability of energy efficiency.

Claims 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 571-272-4912. The examiner can normally be reached on Increased Flextime.

Application/Control Number: 10/567,811

Art Unit: 3753

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keasel Eric can be reached on 571-272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
